MARKET PREVIEW

U.S. stocks extended a global advance, sending the Standard & Poor's 500 Index to a 13-month high, as China's industrial production surged and Federal Reserve policy makers signaled interest rates will remain at a record low. Eighty percent of S&P 500 companies that released results have exceeded the average analyst estimate for third quarter earnings, a record in Bloomberg data going back to 1993, even as profits slumped for a record ninth straight quarter.

Investors are growing more optimistic about U.S. equities for the first time since August as a record number of companies beat profit estimates and worker productivity, manufacturing and home sales exceed forecasts.

The Dollar Index, which tracks the currency against major U.S. trading partners, added 0.1 percent after earlier touching a 15-month low as signs of a global recovery and bets that the Fed will keep borrowing costs low spurred demand for higher-yielding assets.

U.S. Treasury Secretary Timothy Geithner said Asia-Pacific nations need "market-oriented" currencies that are in line with their economic fundamentals to encourage new sources of growth.

The call comes as pressure rises on China, the world's third-largest economy, to abandon the currency's fix to the dollar it has implemented since July 2008. A stronger yuan may help to deepen a shift in the nation's economy toward domestic demand, away from reliance on exports, analysts say.

APEC finance ministers are meeting in Singapore today, before leaders from the 21-member group gather Nov. 14-15. Policy makers in a number of forums, including the Group of 20, have called this year for a shift away from global dependence on American spending and Chinese savings to address trade and investment imbalances that contributed to the financial crisis.

Confidence in the world economy dipped in November as central banks' actions to withdraw some emergency measures sparked concern about the strength of the recovery, a Bloomberg survey of users on six continents showed. The Bloomberg Professional Global Confidence Index fell to 60.3 from 61.7 in October, the highest level in the series that began two years ago. The index exceeded 50 for a fourth month, which means there were more optimists than pessimists.

Asian stocks and currencies rose as an unexpected increase in Australian employment bolstered confidence the region is leading the world out of recession.

CORPORATE
Bajaj to use bike, 3-wheeler parts in \$2,500 car

A joint venture between Nissan-Renault and Bajaj Auto, which plans to launch a low-cost car to compete with the Tata Nano, will have Bajaj small car prototype Tata's small car Nano 70-80% of its parts in common with those used in the Pune-based company's scooters, motorcycles and three-wheelers. This will result in the project cost for the new car being pared down from Rs 1,500 crore to around Rs 200-300 crore. In May 2008, Bajaj, Nissan and Renault had announced plans to manufacture 4,00,000 ultra low cost (ULC) cars per year at a new plant, which would have cost Rs 1,500 crore. Nearly all aspects of that earlier agreement have now changed.(ET)

IDBI Bank, Central Bank cut deposit rates by 0.25-0.5 per cent

Two leading state-owned banks -- Central Bank of India and IDBI Bank have reduced their deposit rates by 0.25-0.5 per cent in various maturities in a bid to bring down the cost of funds. The rate cuts came shortly after country's largest lender State Bank of India slashed its deposit rates by a similar margin. While Central Bank is yet to officially announce the rate reduction, IDBI Bank said the new rates will come into effect from November 16.(ET)

Renuka Sugars acquires Brazilian co for Rs 377 cr

Flush with funds, Indian sugar companies are now acquiring a global footprint. The country's largest refiner Shree Renuka Sugars (SRSL) has bought distressed Brazilian sugar and ethanol producer Vale Do Ivai (VDI) in a deal worth \$82 million (Rs 377.2 crore). This is the first time an Indian sugar company has bought a company overseas and could well pave the way for more such acquisitions by SRSL in Brazil, the world's biggest producer and exporter of sugar and ethanol. SRSL has bought 100% equity in VDI, owned by the Longo family, which gives it control over two ethanol and sugar factories that can together crush 3.1 million tonne cane each year, 18,000 hectares on long lease, along with strategic stake in godowns and loading facilities at Paranagua port, Narendra Murkumbi, managing director and chief executive of the company, said.(ET)

Promoter's 81% in Mundra Port to be merged with Adani Enterprises

Adani Enterprises has been positioning itself for the last two-three years from a pure trading company into a much more asset-structured (one) in the last transformation that has happened. This is a continuing exercise. What it means is that the promoter holds 81% stake in Mundra Enterprises, that 81% gets merged with Adani Enterprises and that is how Mundra Port becomes the subsidiary of Adani Enterprises Ltd. It, of course, does not affect the shareholders of Mundra Port. It is essentially an internal structuring. (Livemint)

ECONOMY
FDI inflows dip to \$1.5 bn in Sept

Foreign direct investment (FDI) inflows slowed to \$1.5 billion in September this year, the lowest since December 2008. Last year, the same month witnessed inflows of \$2.5 billion, while the preceding two months clocked FDI of \$3 billion each, the latest data from Reserve Bank of India (RBI) show. However, economists have termed the lower inflow during September a mere 'blip'. "Once money is committed, inflows tend to bulge and slow down in certain months," said an economist with an investment bank. (ET)

Exports regain some lost ground in October

A pick-up in external demand for products such as electronic goods, iron ore, drugs, oil meal and handicrafts is leading to a slow recovery in India's exports with the contraction slowing to 11.4% in October compared with a 13.8% decline in the previous month. However, exports in value terms, declined to \$12.5 billion (Rs 58,250 crore) in October from \$13.6 billion in September. Although major contributors of exports such as engineering goods and gems and jewellery are still in the negative zone, they have regained some ground since April. For example, engineering goods contracted by 6% in October compared with a 11.9% drop in May. Similarly, exports of gems and jewellery shrank by only 7.8% in October compared with 26.9% in April. In the first seven months of the current fiscal year (April-October), exports have declined 26.5% to \$90.4 billion from \$123 billion in the year earlier. (Livemint)

Imports of sensitive items up by 30.4% in Apr-Aug

Imports of sensitive items, including edible oil, rose by 30.4% during April-August this year, propelled by a 424.8% jump in the shipments of milk and milk products. The overall import of the items went up to Rs 22,429 crore during the period from Rs 17,206 crore in the same period last year, according to official data released here on Wednesday. India's overall imports (including sensitive items) during the first five months of this fiscal, however, declined by 23.3% to Rs 4,97,108 crore from Rs 6,48,041 crore. (ET)

CBDT for tightening norms proposed in Direct Taxes Code

The Central Board of Direct Taxes (CBDT) has urged tightening of the provisions on international taxation proposed in the new Direct Taxes Code, 2009. According to official sources, two issues needing a close look are clarity on general anti-avoidance rules (GAAR) and widening the definition of permanent establishment (PE). The ministry of finance is currently reviewing the Code for finalisation, following diverse feedback. GAAR empowers the tax department to declare an arrangement or structure worked out by a company for any business purpose as an impermissible if it is wholly aimed at avoiding tax. While the Income Tax Act of 1961 did not have any such provisions, the new Code does, albeit with riders. (BS)

INTERNATIONAL
China's factory output touches 19-month high

Chinese factory output growth surged to a 19-month high in October, showing the world's third-largest economy has firmly put the worst of the global financial crisis behind it. Other figures released on Wednesday showed a dip in the pace of investment and loan growth as the impact of the initial burst from a bank-financed 4 trillion yuan (\$585 billion) economic stimulus package, announced a year ago, tapered off. Exports and imports also undershot market forecasts, falling from year-earlier levels for the twelfth month in a row.(ET)

Gold Advances to Record on Weaker Dollar, Increasing Demand

Gold advanced to a record for a second day, driven by speculation that the dollar will extend declines while demand for the precious metal increases as central banks and investors step up purchases. Gold for immediate delivery rose as much as 0.4 percent to \$1,121.90 an ounce. The December-delivery contract on the Comex division of the New York Mercantile Exchange gained for a ninth day, also to a record. Investor Marc Faber said gold wouldn't again trade at less than \$1,000. Shares of producers surged. "The U.S. dollar's direction will continue to drive gold prices in the near term," James Steel, HSBC Securities analyst, wrote in a note e-mailed today. Gold priced in dollars tends to move in the opposite direction to the U.S. currency.(Bloomberg)

Hyosung Scraps Hynix Bid, Prolonging Chipmaker's Sale

Hyosung Corp., the South Korean chemical and trading company, scrapped its bid to buy control of Hynix Semiconductor Inc., setting back efforts by creditors to recoup the \$4.6 billion spent bailing out the chipmaker. Speculation made it difficult for Hyosung to pursue a "fair" acquisition, Hyosung, the world's largest maker of tire-reinforcing materials, said in a regulatory filing in Seoul today. The company said rumors it received any political favors in return for pursuing Hynix were "groundless" and led to misunderstandings in the market. (Bloomberg)

Swiss to impose bonus caps only on 12 big banks

Swiss regulators scaled back plans to curtail banker bonuses, saying their proposals would apply only to the country's 12 largest banks and insurers following complaints the rules would harm smaller companies. Bonuses for senior employees at seven banks, including UBS and Credit Suisse Group, and five insurers should be deferred for three years and may be reduced if losses occur after they are awarded, the Swiss Financial Market Supervisory Authority said in a statement on Wednesday. The agency in June had proposed rules targeting hundreds of companies in the country. (ET)
