Dow	11357	11347	10.0	0.09%	<b>US Stocks</b> erased their losses to finish in positive territory, as investors weighed an improving domestic economy against heightened global concerns. The market moves came after the number of U.S. workers filing new claims for jobless benefits last week fell by a greater-than-expected 24,000 to 435,000, the lowest level in four months																																
Dow Futures	11279	11301	-22.0	-0.19%	<b>Asian:-</b> Asian stock markets were mixed and trading in relatively tight ranges Thursday, with many investors looking to Chinese economic data due later for cues. Investors were looking to a slew of Chinese data due later in the day, including October inflation, industrial output and retail sales, for cues on the strength of the Asian juggernaut and indications of how aggressive Beijing will be in cooling its asset markets after the central bank raised banks' reserve requirement ratios Wednesday.																																
Nasdaq	2579	2563	15.80	0.62%	<b>India:-</b> The BSE benchmark Sensex shed 57 points in a lacklustre session today, with a sharp dip in blue-chip Bharti Airtel's profit and Hindalco's lower-than expected-earnings dampening the sentiment. The market opened on a subdued note, but recovered during afternoon trade on buying at lower levels. However, it could not sustain the momentum and finished in the red. <b>For today, markets are likely to open on flattish note.</b>																																
FTSE	5817	5875	-58.3	-0.99%	<b>Economy:</b> China's inflation accelerated to the fastest pace in two years in October, building the case for the central bank to add to last month's interest-rate increase. Consumer prices rose 4.4 percent from a year earlier, boosted by food costs, a statistics bureau report showed in Beijing today. That was more than the 4 percent median forecast in a Bloomberg News survey of 28 economists.																																
Nikkei	9859	9808	51.6	0.53%	<b>Currency:-</b> The US dollar has declined in the currency exchange markets today against the Indian rupee following three straight days of dollar strength. **G20 to focus on growth beyond crisis**

As the Indian economy moves to a higher growth path, India's stake in a stable, inclusive and representative global economic and financial system will only grow, said Prime Minister Manmohan Singh prior to departing for the fifth summit of the G20 taking place at Seoul, South Korea on Nov 11-12. India will work for such a framework in the G20, which represents the 20 largest economies of the world and has replaced the G7 as the premier international body for economic and financial policy coordination. **India sees red as EU allows duty-free access to Pak textiles**

India will oppose preferential access given to Pakistan's textile industry by the European Union as a relief measure against the devastating floods, a move that could render India's exports to the region uncompetitive. **Cos bill to be tabled in house next session**

The government will not be able to introduce the Companies Bill in the ongoing Parliament session. The final draft of the bill will now be presented before Parliament in its budget session next year. "Not this session. Companies Bill will come next session," corporate affairs minister Salman Khurshid said on the sidelines of a function held in the Capital. However, Mr Khurshid expressed hope that key amendments to the Competition Act 2002 that will require high-stake mergers and acquisitions to seek a mandatory approval from the Competition Commission of India, will be taken up for consideration in the ongoing session. The ministry had set for itself a deadline of tabling the final version of the bill in the current winter session, after considering changes to the Bill following recommendations submitted to it by the parliamentary standing committee in August this year. <b>China trade surplus rises to \$27 bn; heat on yuan</b>	China's trade surplus grew in October as both exports and imports rose on-year, the government said Wednesday, adding to pressure on Beijing ahead of the G20 summit to let its currency appreciate. The trade surplus expanded to \$27.15 billion in October, customs authorities said, before a Group of 20 summit in Seoul that is expected to focus on rebalancing the skewed global economy. (ET)
<b>EU seeks \$1.4 trillion push for energy infra</b>	European Union regulators urged EU governments to hasten approval of "strategic" energy projects and pledged measures to spur \$1.4 trillion of infrastructure investment needed over the next decade. The European Commission, the 27-nation bloc's regulatory arm, called for simpler and shorter authorisation procedures for constructing and funding electricity and natural-gas projects. (ET)
<b>Greenspan Says U.S., China Currency Moves Risk Protectionism</b>	Alan Greenspan, former chairman of the U.S. Federal Reserve, said the U.S. is pursuing a policy of weakening the dollar that risks increasing trade protectionism when combined with China's effort to suppress the renminbi. "The suppression of the renminbi and the recent weakening of the dollar are, of necessity, producing firming exchange rates in the rest of the world," Greenspan wrote in a column in the Financial Times today. The ratio of global exports to gross domestic product, which recovered following the financial crisis, was again slowing in the third quarter, Greenspan said. Protectionism would accelerate that slump, he said. (Bloomberg)
<b>China' Dagong lowers US rating on Fed QE</b>	China's Dagong Global Credit Rating Co reduced its credit rating for the US to A+ from AA, citing a deteriorating intent and ability to repay debt obligations after the Federal Reserve announced more monetary easing. The credit outlook for the US is "negative", as the Fed's plan to buy government debt will erode the value of the dollar and "entirely encroaches" on the interests of creditors, analysts at Dagong, one of China's three largest ratings companies, said in a statement. The US is rated Aaa and AAA by Moody's Investors Service and Standard Poor's Corp, the highest credit ratings of the New York-based companies. (ET)
