The RBI has raised rates 13 times over 19 months, the last in October, but headline inflation remains near double digits. Food inflation accelerated to a nine-month high in late October, belying hopes of a respite in overall price pressures in the near term and a quick turn in the RBI's monetary stance.</p> <p>Market is likely to open positive and may increase further during the day.</p> <p>Economy: China's inflation cooled to the slowest pace in five months as gains in food costs moderated, giving policy makers more room to support economic growth as Europe's debt crisis threatens exports. Consumer prices rose 5.5 % in October from a year earlier, the statistics bureau said. That matched the median forecast in a Bloomberg News survey and compared with a 6.1 % gain in September. Producer prices rose 5 % last month, less than any of 24 analysts' forecasts.</p> <p>The number of positions waiting to be filled in the U.S. rose in September to the highest level in more than three years, indicating some companies are preparing for an improving economy. Hiring advanced by 185,000 to 4.25 mn, and firings also climbed.</p> <p>Hong Kong Chief Executive Donald Tsang said the city's economy may have slipped into a recession in the third quarter as Europe's debt crisis roiled markets. Growth may be as little as 2 % next year after a likely expansion of 5 % this year, Tsang said in an interview at Bloomberg. That would compare with a 7 % gain last year.</p> <p>Commodities: Oil prices rose to near \$96 a barrel in Asia, extending a 27 % rally during the last month amid signs the U.S. economy isn't slipping back into recession.</p> <p>Gold was steady, consolidating near a one and a half month high, with investors holding onto the safe haven asset due to fears that the euro zone debt crisis might engulf Italy.</p> <p>Currency: The euro edged down against other major currencies in Asia on investor concerns that Italy was next in the line of fire in the European sovereign debt crisis.</p>

October exports growth up by 12.4% on slow demand from developed markets; imports increase by 36.7%

India's exports growth slumped in October, as demand slackened from the developed markets, widening the country's trade deficit to a four-year high. Exports grew 12.4% to \$19.9 billion in October from a year ago, much slower than 36.5% in September and 52% in the April-September period, data released showed. "We have been saying that exports are going to slow down in the second half of the fiscal. It happened a month late, but the chickens have come home to roost," Commerce Secretary Rahul Khullar said. FICCI too expects inflation to dip Dec onwards

RBI's claims of inflation easing from December onwards has found support from industry body, FICCI which otherwise is critical of the central bank's tight monetary stance. In the economy watch report, the chamber attributed its thesis of easing inflation from this year end to the high base effect of December 2010 to April 2011. The inflationary expectations, which make companies raise prices, have registered a sharp decline, which may be mirrored in the Wholesale Price Index as well. However, due to supply side constraints, food prices will firm up this winter as well. (BS)

S&P puts ArcelorMittal rating on negative outlook	Steel giant ArcelorMittal risks having its credit ratings lowered to "junk" level after Standard and Poor's revised its outlook due to concerns the Luxembourg-based company won't be able to cut its debt. "The outlook revision reflects our view that ArcelorMittal's leverage is currently above the levels we consider commensurate with the 'BBB-' rating, and that the probability of deleveraging in the near term has decreased given the uncertain macroeconomic environment," the ratings agency said in a statement. The company had nearly \$25 billion in debt at the end of September. (ET)
